Flagship AI 4K Webcam

Insta360 Link 2C Pro | Insta360 Link 2 Pro

What's New

Built on the foundation of Link 2, the Pro Series brings major upgrades in both **image** and **audio quality**, along with new **practical features** such as Tracking Area, Green Screen, and StreamDeck integration.

Two versions are available to match different user scenarios and professional needs.

Use cases

Video conferencing

Online education

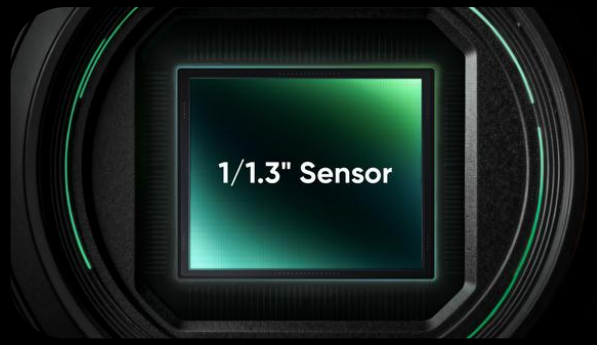

Streaming

Content creation

Insta360

1. Premium Image Quality

2. Crystal-clear Audio

3. Tracking & Framing

4. Seamless Integration

5. Productivity

6. Link Controller

Upgrade

Flagship 1/1.3" Sensor

A significantly larger sensor with up to 2.4 μm pixel size, capturing more light and delivering exceptional dynamic range. Produces sharper, cleaner video in fast motion and low-light environments.

Upgrade

Exceptional Low Light Performance

Clear, vivid video in any lighting. The 1/1.3" sensor and advanced image processing maintain balanced exposure from dim environments to brightly lit rooms.

Upgrade

Dual Native ISO and HDR

Cinema-grade exposure control adapts smoothly between highlights and shadows, ensuring you appear perfectly exposed whether in bright offices or evening calls.

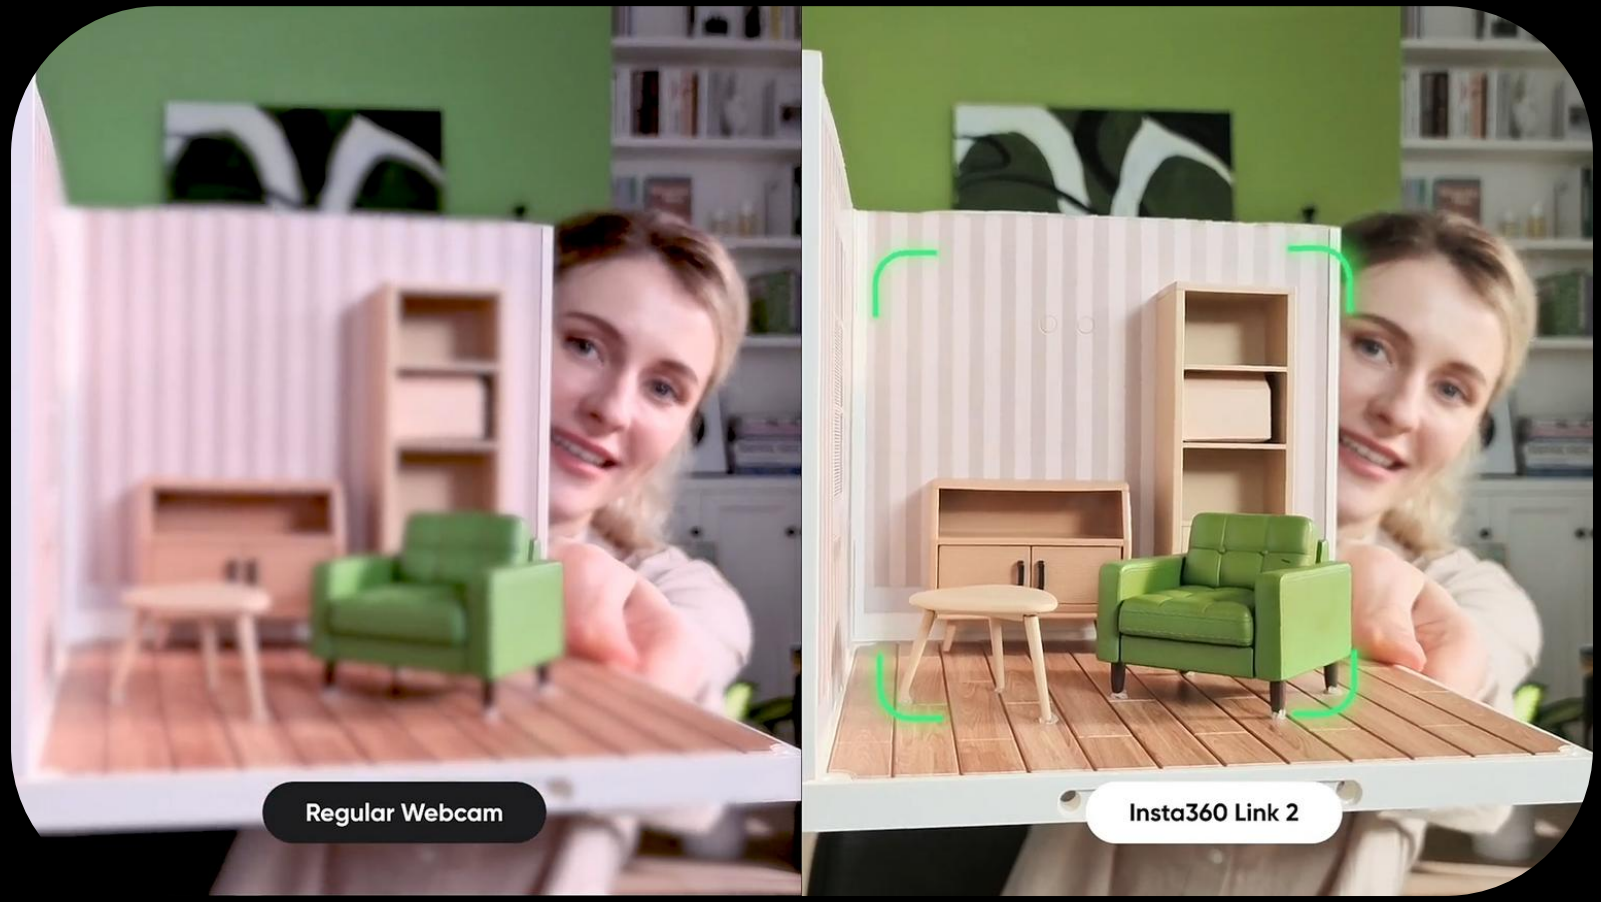

Natural Bokeh

Automatically recognizes people and adjusts depth of field in real time, producing a professional, cinematic look that keeps the subject crisp.

True Focus

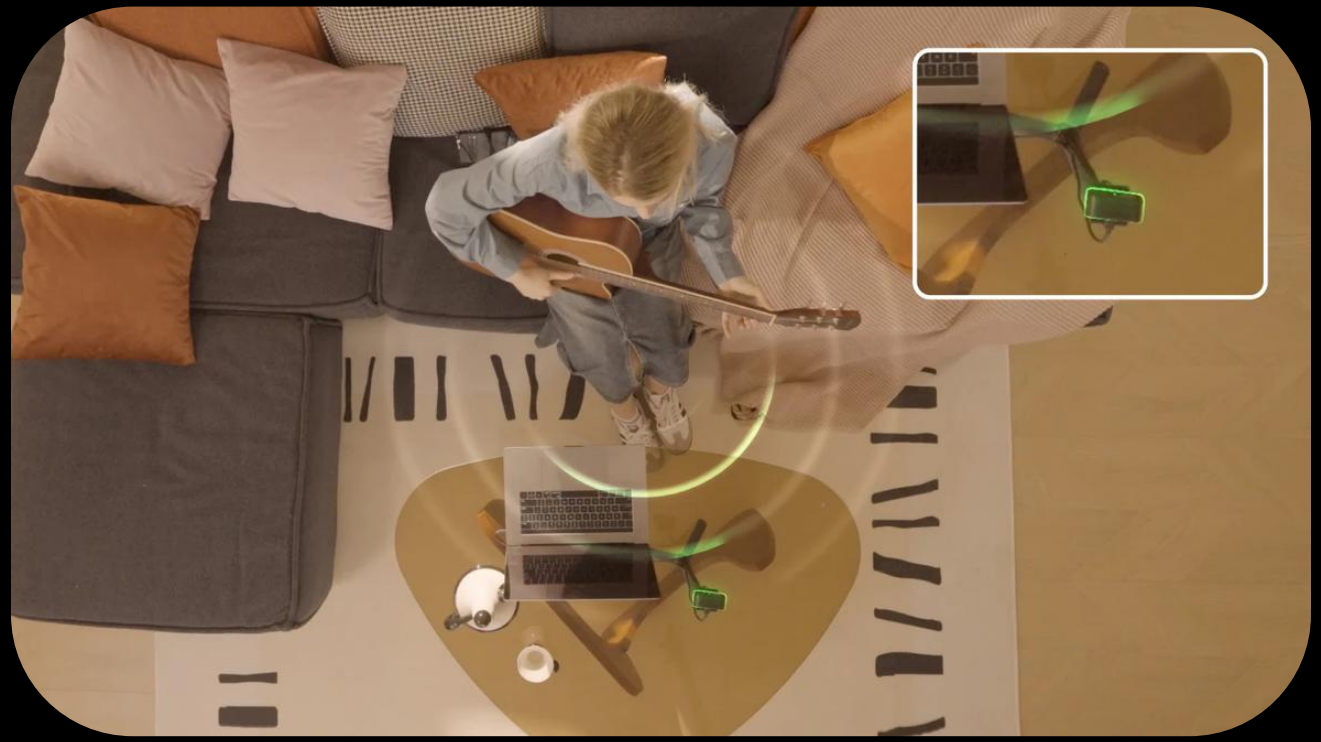

Phase Detection Autofocus locks on quickly and accurately. Fast, reliable, and consistently sharp.

New

Dual-Microphone & Beamforming

Capture sound with clarity using four precision-engineered pickup modes optimized for different scenarios and environments.

Audio Pick-up Modes New

Standard

Balanced audio for everyday use.

- Enhances voices naturally31b3
- Light noise reduction without over-processing

Origina

For users who prefer pure, unprocessed audio.

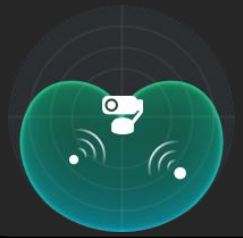

- No noise reduction applied
- Preserves natural tone - ideal for music or teaching

Wide

Ideal for single or multi-person meetings.

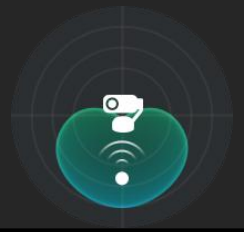

- Captures all voices in front clearly
- Suppresses noise and voices coming from behind

Focus

Ideal for noisy or busy environments like cafés, open officees.

- Narrower pickup range to emphasize voice within 1 meter
- Strongly reduces voices and noise
- As noise suppression is stronger, Audio Quality is slightly lower than Wide

AI Tracking & Auto Framing

AI Tracking (Link 2 Pro)

Physical gimbal movement tracks subjects around the room.

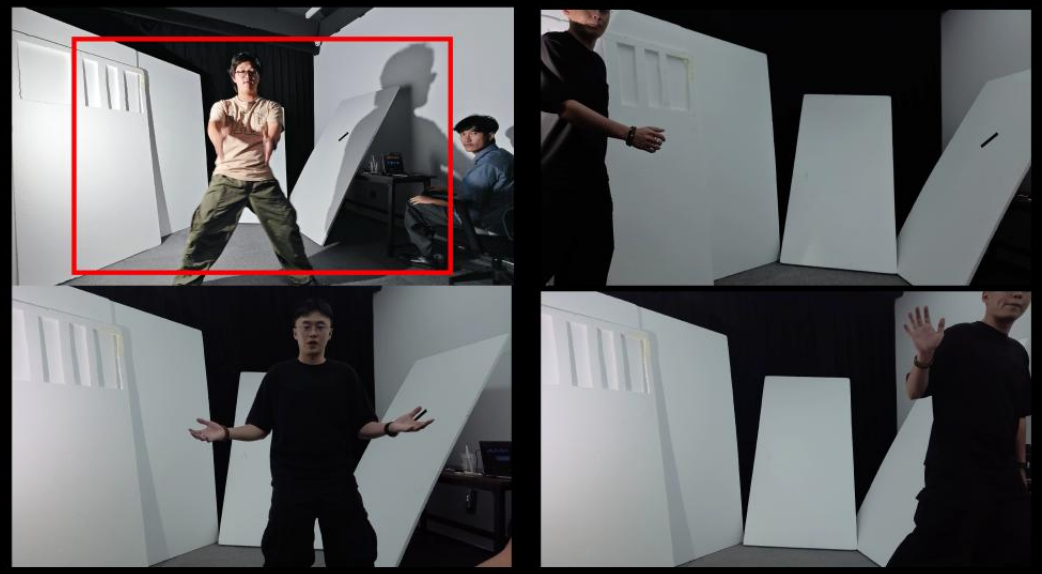

Choose single-person or group tracking via Link Controller.

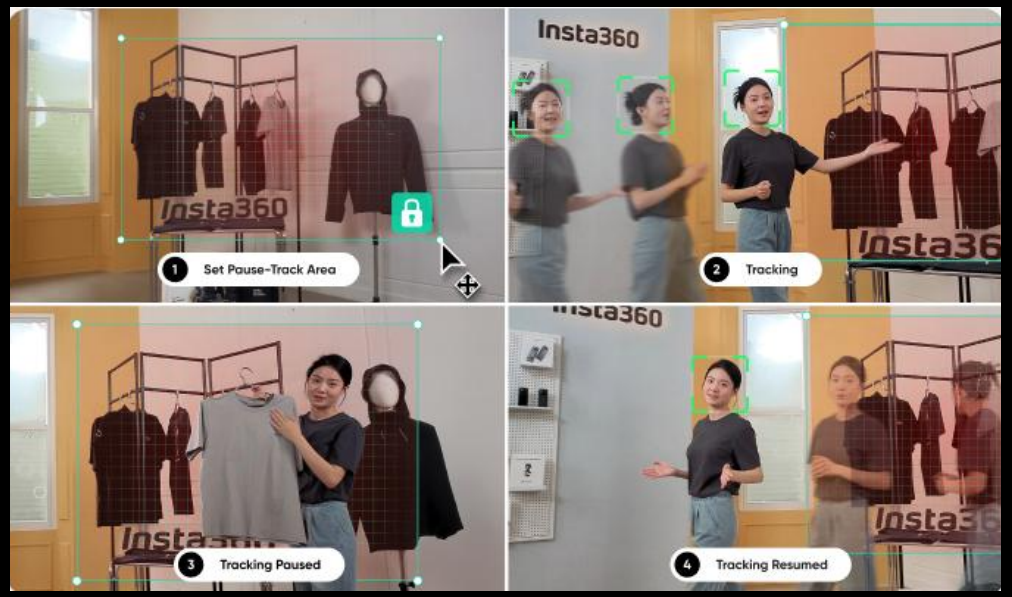

Auto Framing (Link 2C Pro)

Automatically zooms and adjusts framing to keep individuals or groups clearly in view.

Advanced Tracking Control

New

New

Tracking Area

Limit tracking to defined zones for consistent framing and privacy.

Typical Scenarios

- Work-from-home privacy protection

Pause-Track Area

Set zones where tracking pauses naturally. Keep focus only where you need it.

Typical Scenarios

- Product close-ups
- Whiteboard/blackboard explanations

New

Insta360 WaveLink Pro

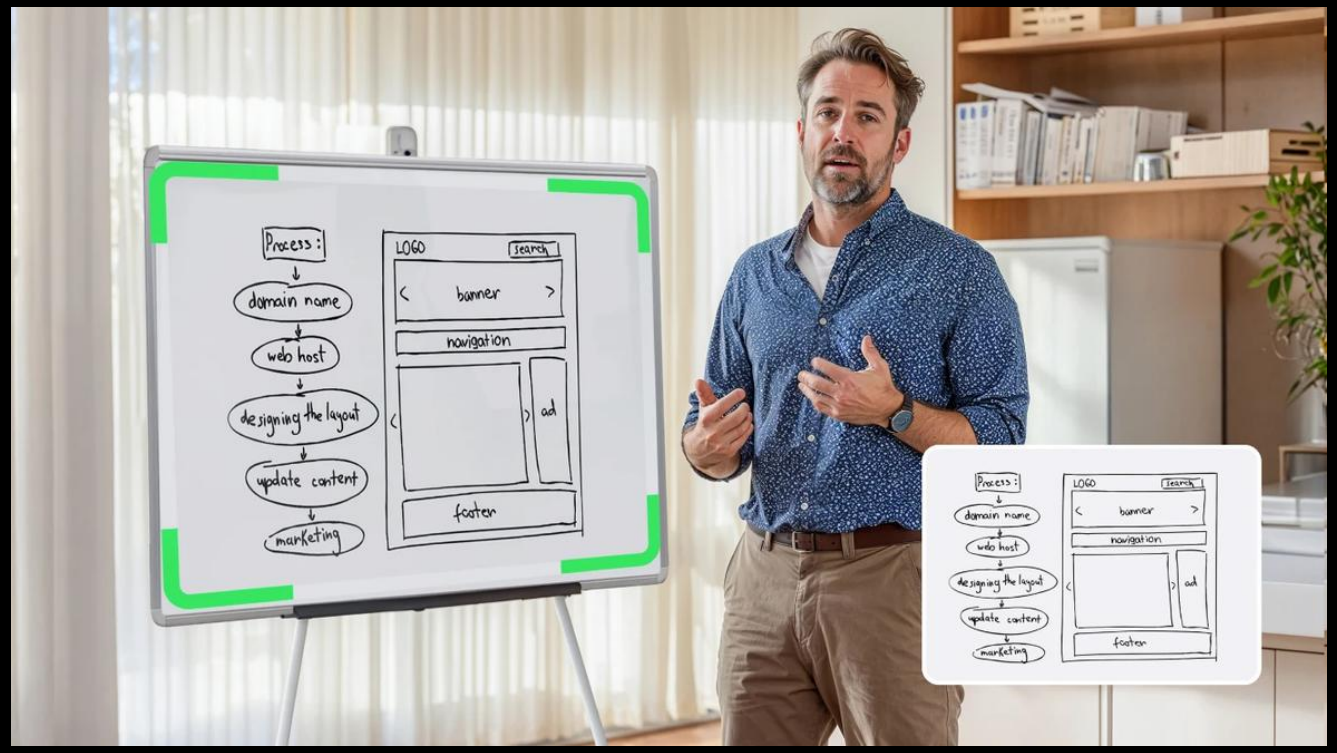

Pair Link 2 Pro with Insta360 Wave for a complete conferencing solution. Wave's DOA technology detects who's speaking and directs the camera's focus for natural, balanced discussions.

Upgrade

Smart Whiteboard Detection

Link 2 Pro's advanced AI detects and frames your whiteboard automatically, keeping it in focus and optimizing the view without any stickers or apps required.

Versatile Modes

DeskView Mode

Tilt down to share your workspace in real time. Ideal for showing sketches, documents, or demos with total ease.

Gesture Control

Switch modes, activate tracking, or zoom using simple hand gestures. No clicks required.

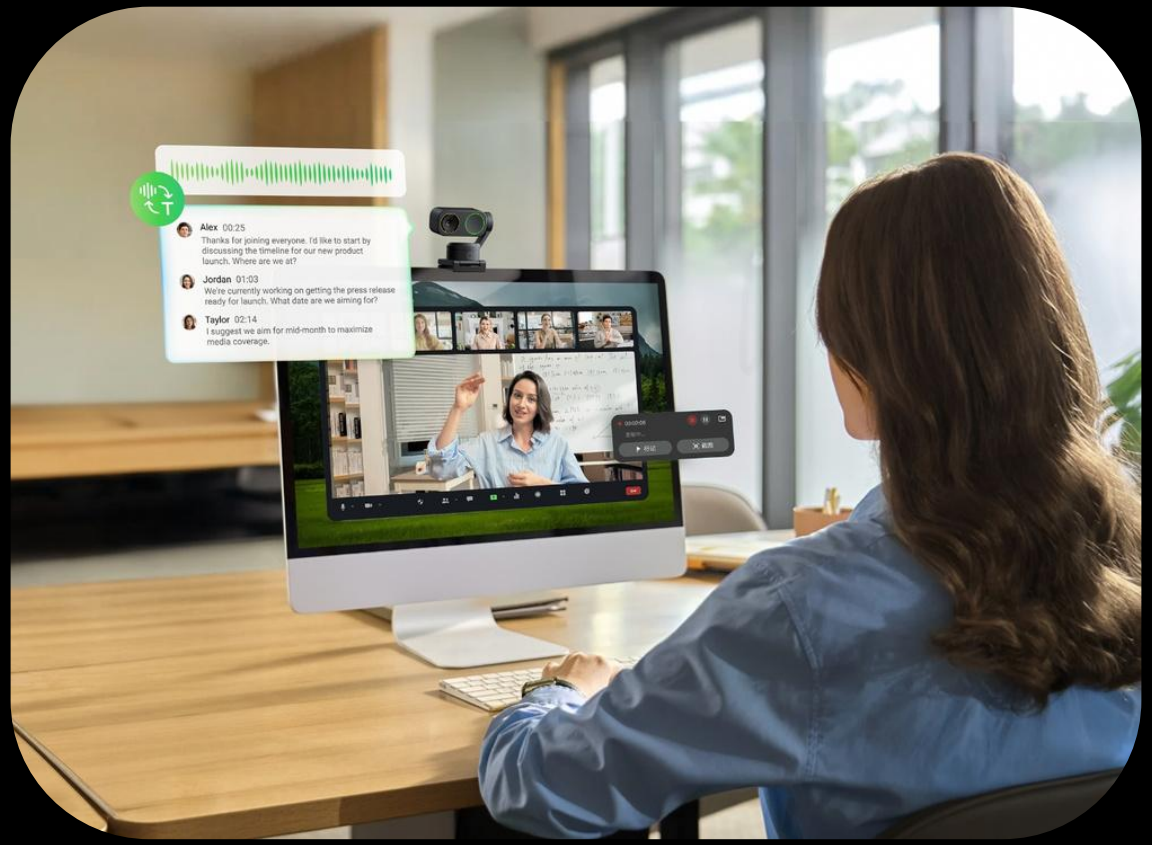

Portrait Mode

Native 4K vertical capture. Rotate the camera to start creating social-ready content with zero cropping.

New

Insta360 InSight — AI Meeting Assistant

Fully integrated into Link Controller. Access automatic transcription, smart summaries, and AI-assisted meeting tools to streamline productivity.

Virtual Background

Powerful options, designed for you to look your best no matter the context.

Background Blur

Effortless privacy your viewers will barely notice.

Background Replacer

Whatever the mood, use your own custom images or our selection.

New

Green Screen

Professional keying made simple. Replace your backdrop for teaching, streaming, or content creation with clean, high-quality results.

Privacy Mode

Complete protection.

Link 2 Pro

Enters Standby Mode after 10 seconds of idling, or just simply push it down.

Link 2C Pro

Features a convenient physical shutter that lets you block the lens with a simple push.

Insta360 Wave

FOR BUSINESS

Professional AI Conference Speakerphone

Clearer • Sharper • Smarter

Wave Business Edition vs Wave Standard Edition

Wave For Business: Built for easy deployment, stable performance, and long-term enterprise use.

Open API Access

- Monitor device status and manage remotely
- Lower maintenance workload
- Supports system integration

Works with Insta360 Connect

- Smart audio switching
- Extended pickup range

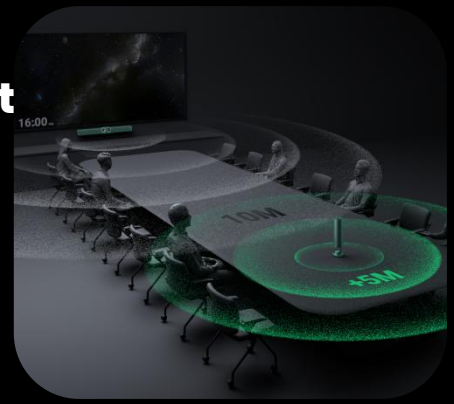

Table Mount included

- Keeps Wave stable in meeting rooms

Simple Interface

- Easy to use
- Designed for teams

3D 8-Mic Array, 5m Far Pickup

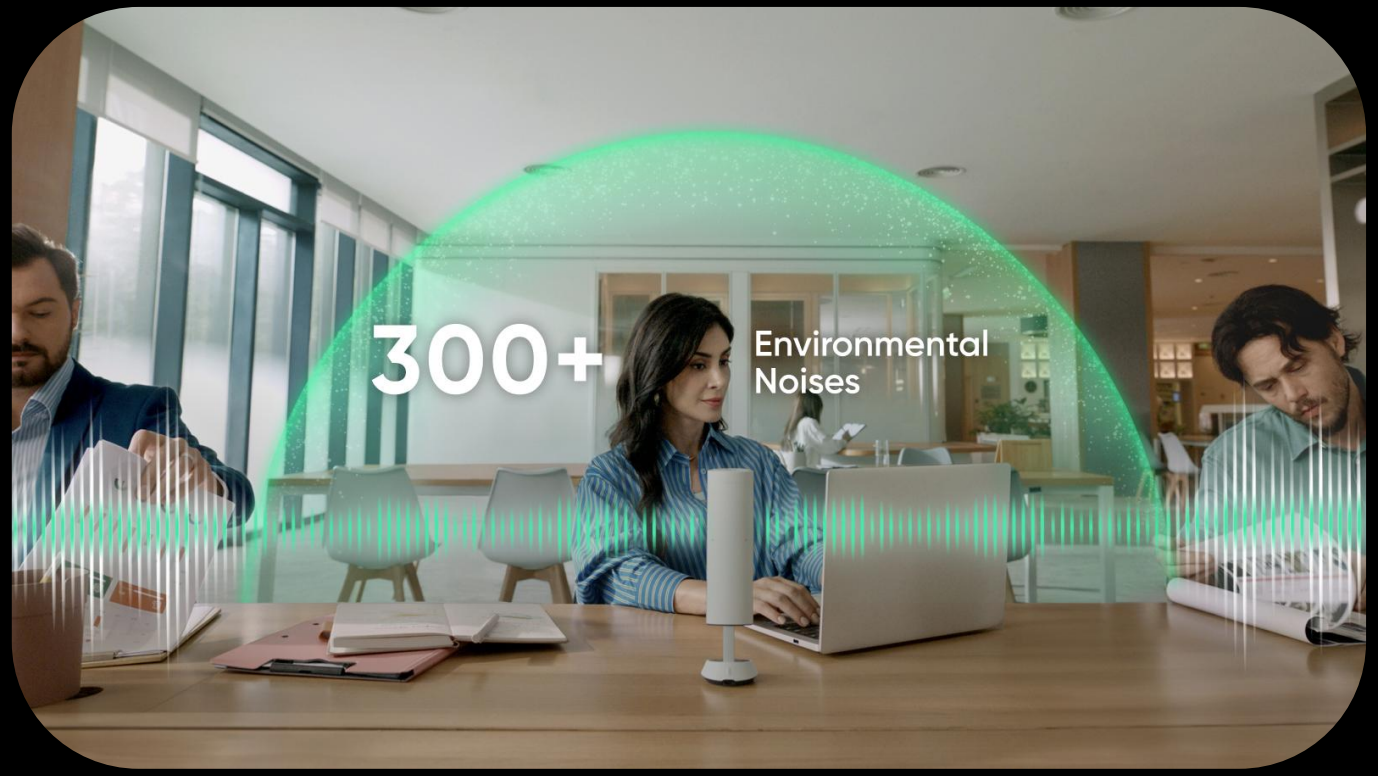

Insta360 Wave captures voices from up to 16 feet away with high clarity. Pro-grade 48kHz sampling rate and Automatic Gain Control ensure no details are missed.

AI Noise Reduction, Designed for Real Meetings

Insta360 Wave identifies and eliminates over 300 types of environmental noises. No matter the situation, you're heard loud and clear.

Optimized voice pickup

Choose from 5 precision-engineered pickup patterns to get optimal audio based on your surroundings.

Huddle Room/ Mobility/General Office Meetings

Omni

Captures sound from all directions (360°)

For group meetings or round tables

Cardioid

Focuses on the front

For meetings, podcasts, or live streams

Supercardioid

Stronger noise suppression of ambient sound

For noisy spaces

Content Creation

Figure-8

Picks up front and back

For two-person interviews or chats

Stereo

Uses left and right channels to record wider

For ASMR or music performances

AI De-Reverb & Echo Cancellation

Say goodbye to hollow, distant sound. Dereverberation works to ensure your voice is full, natural, and crystal clear.

Full Duplex Audio Technology

No delays, no dropouts. Speak freely as our leading audio technology keeps the conversation flowing in both directions.

Wave + Connect

Crystal Clear, Ready for Work

Dual mic arrays optimize sound pickup based on the location of the sound, enhancing speech in complex environments.

- Enhanced audio pickup: enabling smart audio switching for peak audio quality.
- Extended pickup range: When paired, get up to 20m pickup range, great for larger meetings.
- Unified control of Connect and Wave via control tablet.

Wave + Link 2

All-in-one solution, best for huddle rooms

Mic + speaker + camera, all-in-one.

- **4K UHD video + AI Noise Reduction**
- **Tracks active speaker, ideal for solo use or small meetings with 3–4 participants.**
- **Easy setup: Link 2 mounts onto Wave magnetically, no additional steps or cables required.**

Device Information

- Centralized monitoring of device status and performance for efficient remote management.
- Open APIs for easy integration with existing systems.

Remote Control

Enable remote device maintenance to reduce downtime and on-site inspection costs, improving overall device management efficiency.

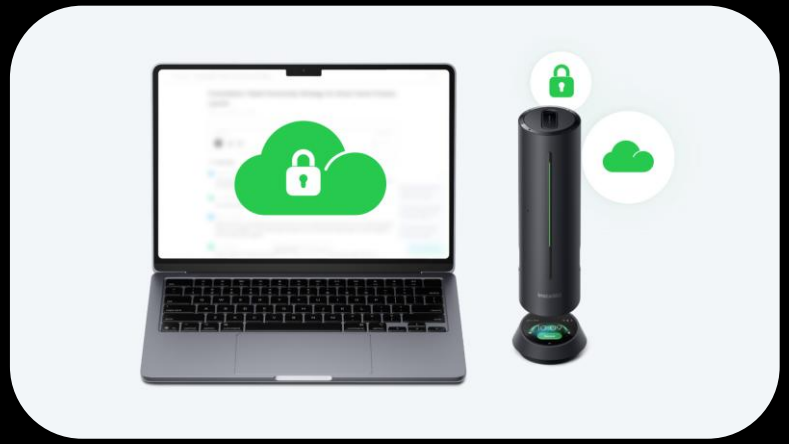

Audio Files

Managing meeting recordings to meet risk control requirements, while turning them into reusable knowledge for the enterprise.

Wave provides a role-based access control, which enables administrators to be assigned with device management permissions, including control over：

- **Bluetooth**
- **Recording**
- **On-screen live-captions**
- **AI Summary**
- **Audio Mode**
- **...**

Admins can toggle Wave based on the organization's operational needs.

Safe Mode: Bluetooth and Recording are disabled by default.

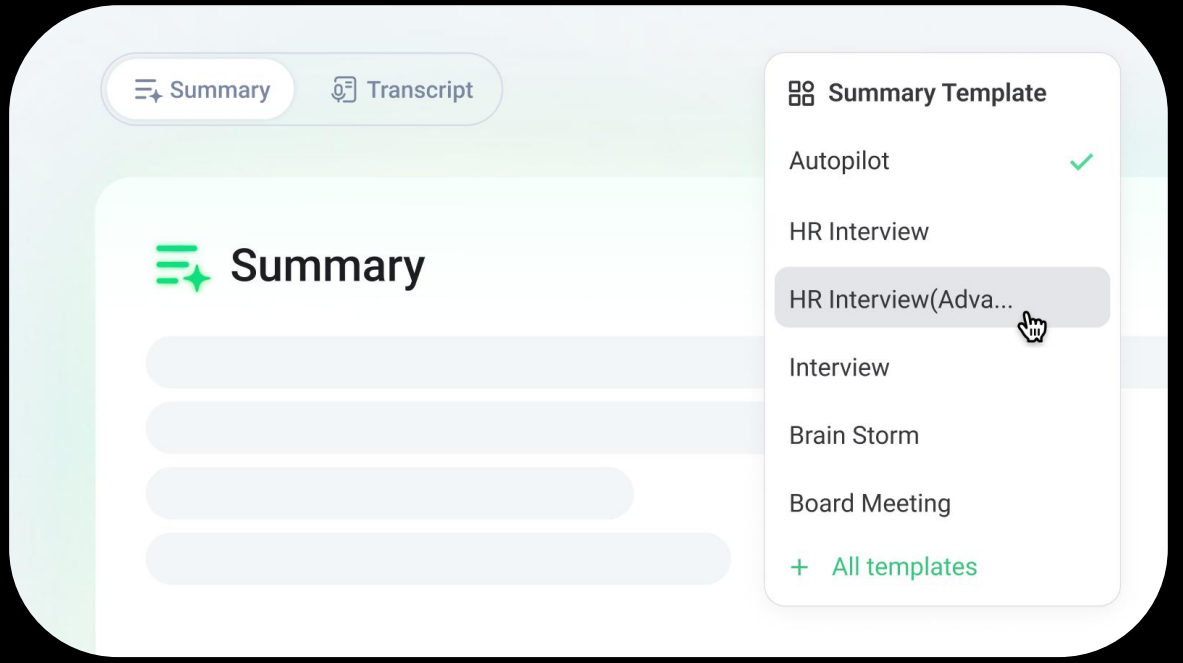

- **By restricting operational configurations to administrators, IT teams can reduce routine inspection and maintenance workload.**
- **Administrators can manage key functions such as recording and summary, protecting information security.**

AI Summary & Meeting assistant

Visualized Summary & Secure Access

An all-in-one meeting assistant platform to review meetings and boost team productivity.

- **InSight offers a full suite of AI features including meeting transcription, AI Summary, and AI Q&A.**
- **Smart Permissions: Manage teams with a permission matrix and hierarchical sub-accounts.**
- **Employees can sync meeting recordings directly to their enterprise-linked accounts.**

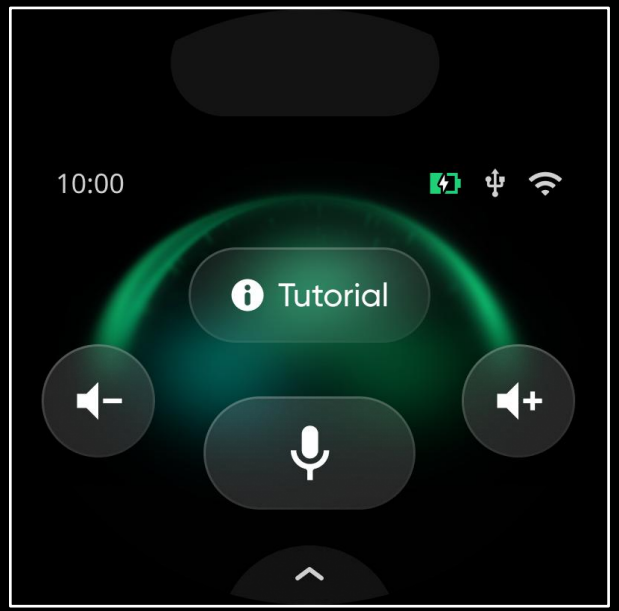

Simple Interface

Clear labels. Simple, intuitive operation.

- **Clear labels, touch-friendly**
- **Instantly usable, zero learning curve**
- **No blind spots, accessible from any angle**
- **Low training, low errors, low maintenance**

Enterprise

VS

Standard

3 Connection Methods

- USB-C
- Bluetooth
- Dongle

Table Mount

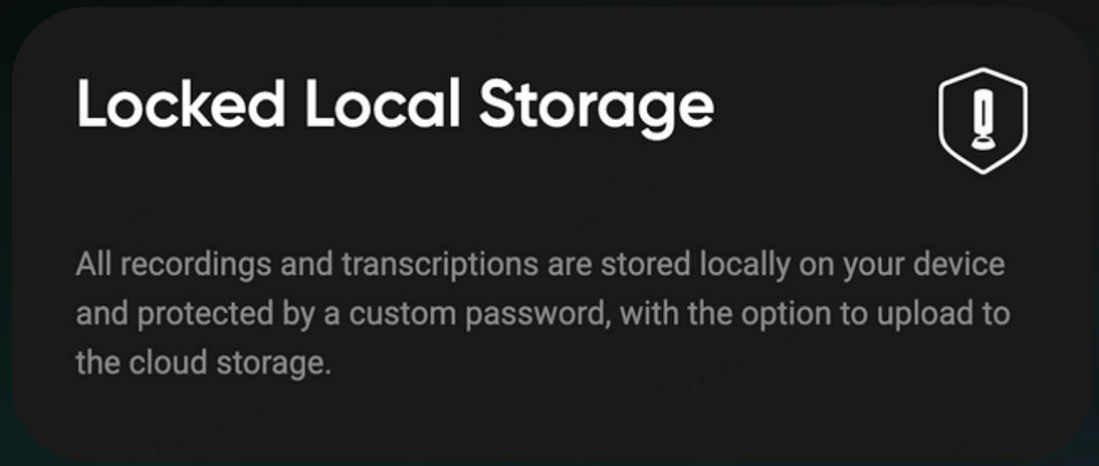

For long-term deployment
Supports both adhesive and screw mounting
Equipped with kensington nano lock slot

Privacy & Safety

- **Locked Local Storage:** All recordings are **stored locally on your device and protected by a custom password**, with the option to upload to the cloud storage.
- **Trusted Cloud Storage:** Powered by **AWS**, Insta360 InSight meets the highest data security compliance standards to keep your files secure and your data protected. (ISO 27001/27701, ISO 27017/27018, and CSA STAR)

Insta360 Connect

Dual-camera AI video bar.

zoom Certified

Android-based BYOD system (connects to laptop via USB)

Plug and Play

Dual-4K Cameras

AI Resolution+

AI Framing

Speaker Tracking

14 Mic Array with 33ft Voice Pickup

Adaptive Audio

Whiteboard Mode

Speakerphone Mode

Privacy Mode

Plug and Play

Simply connect a laptop via USB and you're ready to start. Works with all major video conferencing platforms.
If you also wanna share content on a TV or display the meeting there, connect your laptop via HDMI cable.

Dual-4K Cameras

A wide-angle cam (110°HFOV) with a 1/1.3" CMOS sensor pairs with a telephoto gimbal camera, working seamlessly together to capture 4K group views and individual close-ups for unparalleled meeting visuals.

AI Resolution+

See the speaker in double resolution for enhanced communication. AI Resolution+ uses machine learning to transform the image quality and detail of whoever is speaking.

Group Framing

Automatically adjusts to the number of participants, providing an inclusive view that presents the whole team together, creating a more realistic experience for those joining the meeting remotely.

8K Gallery Mode

Ensure every participant gets their own individual window, no matter who's speaking. All in industry-leading 8K resolution.

**** Maximum 8 cropped images.***

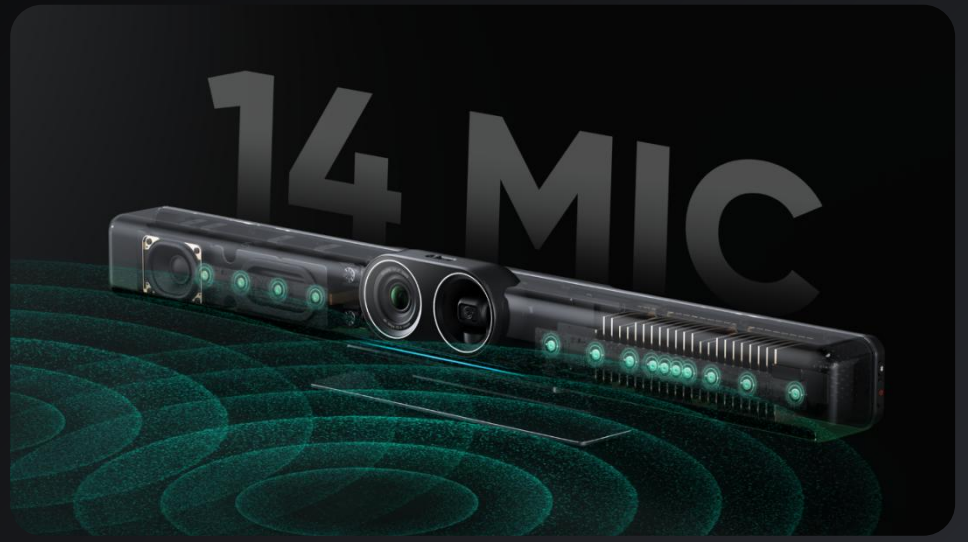

Speaker Tracking

DOA (Direction of Arrival), voiceprint, face, body and lip recognition technology precisely track the speaker and keep them center stage as they speak.

Multi-person tracking monitors all participants, enabling quick and accurate transitions between speakers.

14 Mic Array

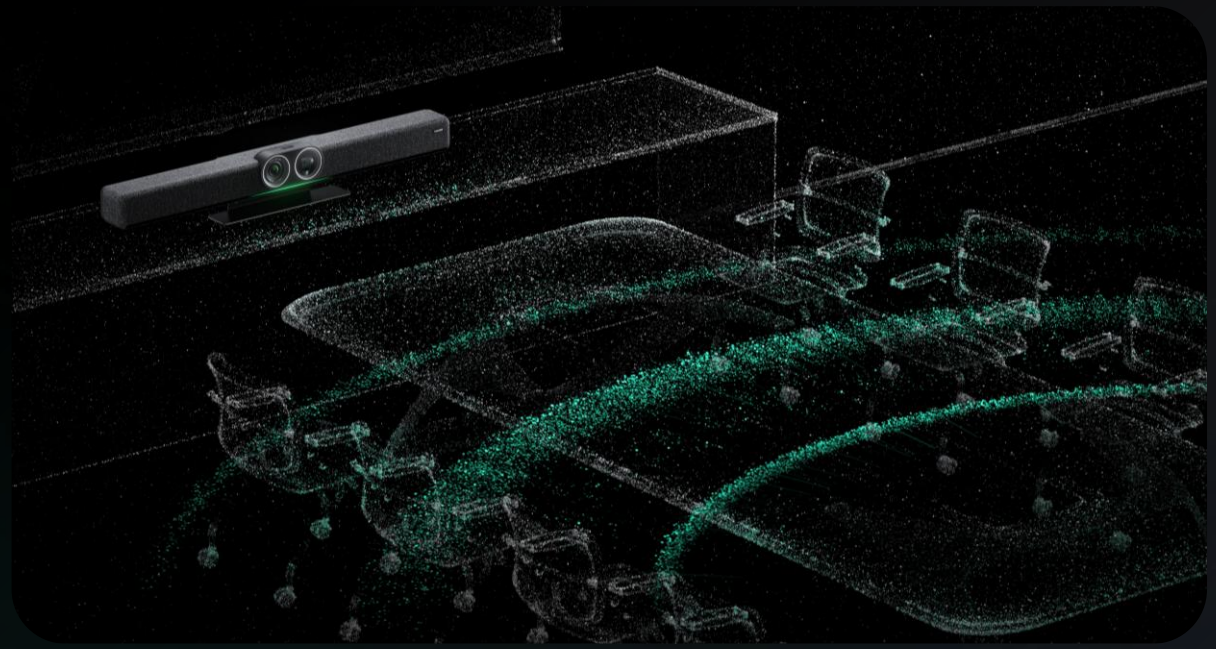

An industry-leading 14-microphone array captures voices from every corner of the room with precision.

33ft Voice Pickup

A cutting-edge 3A algorithm eliminates unwanted noise and echoes, picking up voices up to 33ft away with balanced volume, supreme clarity and natural, immersive sound.

Adaptive Audio

Intelligent noise reduction technology analyzes your real-time acoustic environment to remove background noise and reverb, ensuring interruption-free meetings.

Whiteboard Mode

Present from a whiteboard with ease. Squares off and enhances a whiteboard, giving participants a clearer view and keeping it visible even if someone blocks the camera. Connect automatically recognizes whiteboards even if they're not directly facing, or from a side-on view.

Modes

Speakerphone Mode

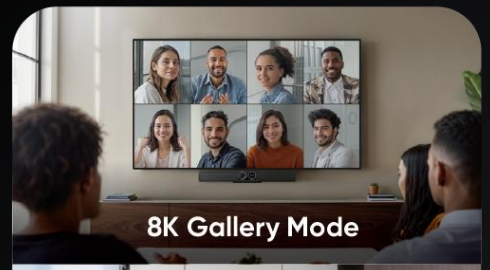

The classic conference call, now with pro-level audio. Connect easily via Bluetooth for crystal clear audio.

Privacy Mode

Slide to conceal the lens, mute the microphone, and tilt the gimbal camera down for instant privacy whenever it's needed.

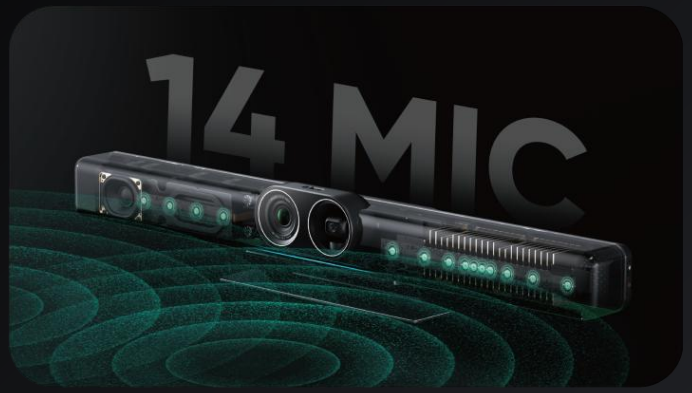

Plug and Play

AI Resulotion+

Speakerphone Mode

Insta360

Insta360 Connect + Link 2

Multi-camera solution for
medium to large spaces.

Pain Points Scenarios of Traditional Cameras

Online&Offline sharing/training

The gestures and facial expressions of presenters standing on the side cannot be fully captured

- Poor experience for remote participants
- A significant drop in information transmission efficiency.

Business negotiations

When negotiating parties sit face-to-face sideways, remote participants struggle to clearly observe the facial micro-expressions and other details

- The omission of key non-verbal cues
- Makes it easy to miss critical decision-making information and thus impairs judgment.

Connect + Link 2 Multi-Camera Solution

Medium to Large Meeting Rooms

Goodbye Blind Spots

Link 2 cameras eliminate Connect's blind spots. Remote participants stay in the moment, whether you're speaking or writing on a whiteboard.

Connect + Link 2 Multi-Camera Solution

Medium to Large Meeting Rooms

Great for Business Discusstion

Capturing facial expressions and gestures so remote and on-site teams stay aligned and engaged.

Connect + Link 2 Multi-Camera Solution

Medium to Large Meeting Rooms

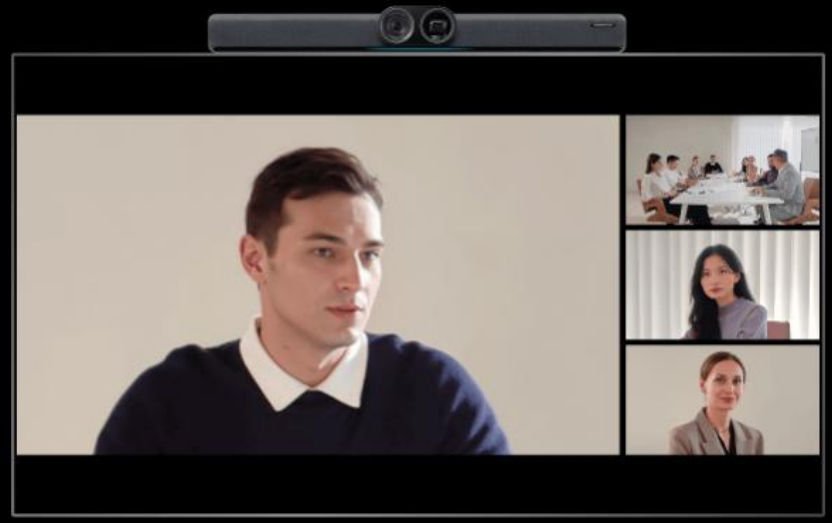

Multi-Camera Layout

Equal Division

Single Stream Full Screen

1+N Mode

A setup for any meeting style

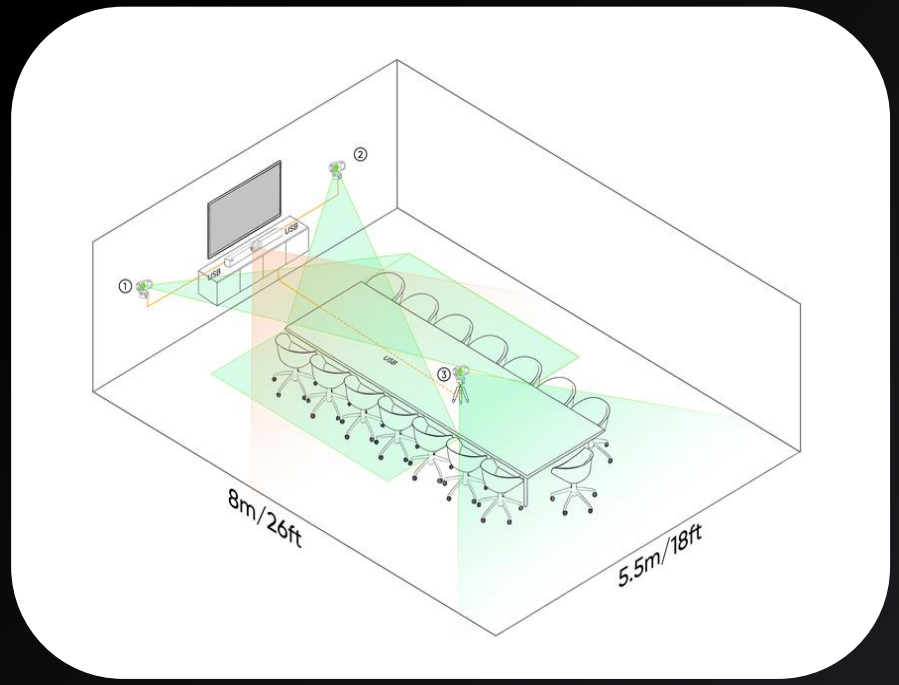

- Discussions, presentations, training and more.

Recommended Deployment

Solution 1

Link 2 Usage

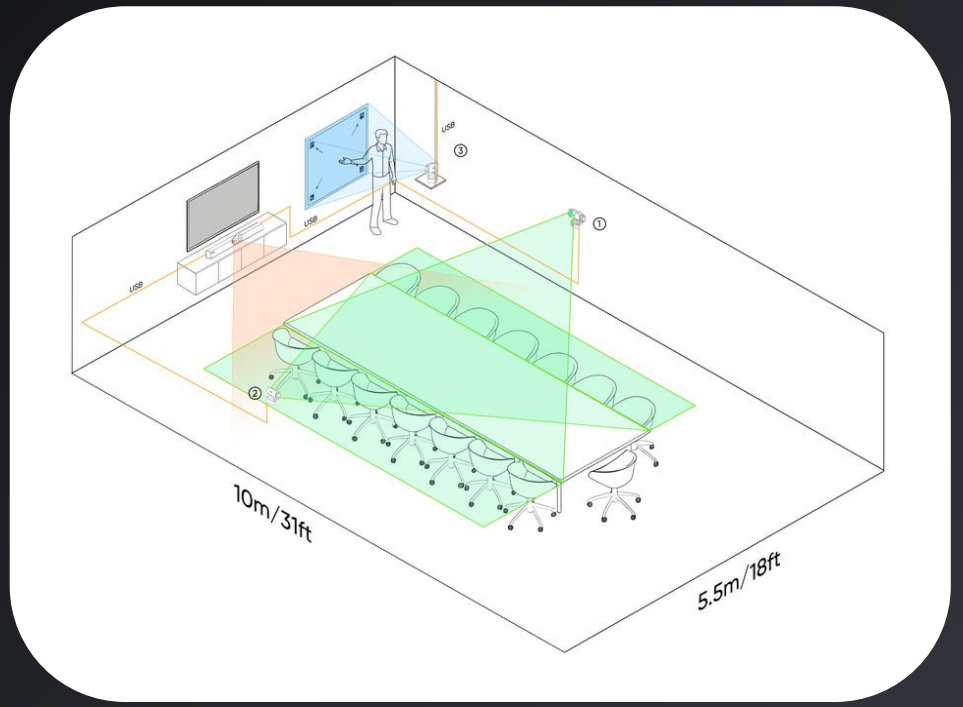

- Camera 1 & 2: Capture participants seated on the opposite side of the table.
- Camera 3: Allows for close-up shots of a participant.

Solution 2

Link 2 Usage

- Camera 1 & 2: Capture participants seated on the opposite side of the table.
- Camera 3: Allows for close-up shots of a speaker

*Insta360 Connect supports up to three Insta360 Link 2 units in Multi-Camera Mode

Connect + Wave Multi-Speakerphone Solution

Crystal Clear, Ready for Work

Dual mic arrays optimize sound pickup based on the location of the sound, enhancing speech in complex environments.

- **Enhanced audio pickup: enabling smart audio switching for peak audio quality.**
- **Extended pickup range: When paired, get up to 20m pickup range, great for larger meetings.**
- **Unified control of Connect and Wave via control tablet.**
